

Windows Should Be Seen and Not Heard

We invite you to enjoy the sound of silence.

Unless you like the shuddering vibrations of old windows when you try to close

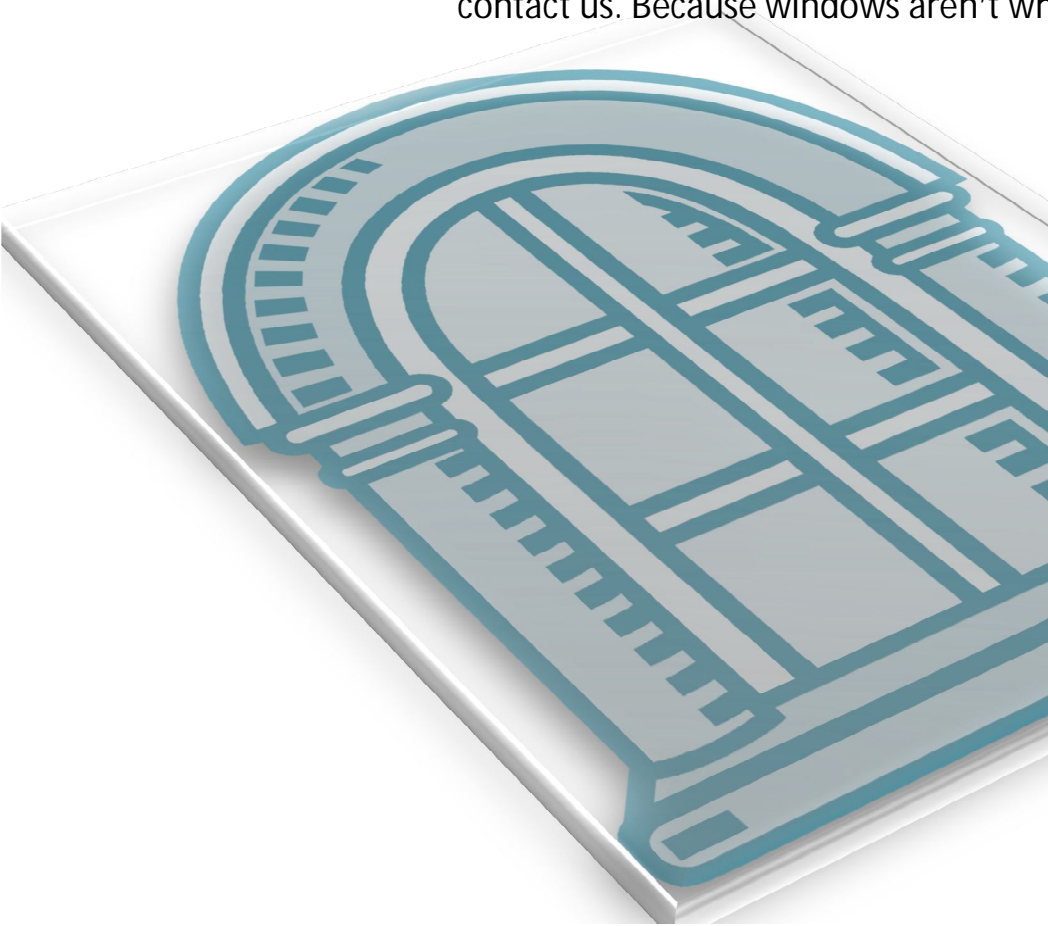

them. **Perhaps the screech of scraping peeling paint**

brings back the good old days. Or maybe you appreciate listening to your neighbor's chain saw drone on because your old windows don't close.

But we don't think so.

At R Factor, we believe quiet windows are the best windows. After all, wouldn't you rather hear your new CD?

For the beautiful look and style of windows you choose,
and a whole lot of quiet going on,
contact us. Because windows aren't what you should be hearing.

**Quiet Windows
from R Factor**
